DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The new limitation concerning the interface section comprising a bridging connection position midstream along a bi directional communication path added to independent claims 1, 11 and 19 would constitute new matter. Examiner cannot find a description in the specification that would convey this limitation. Examiner acknowledges applicant reference to figure 4, but support cannot be established in the description of figure 4 with regards to this limitation.

Allowable Subject Matter

Claims 24-39 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: With regards to claims 25-28 and 31-34, the prior art of record does not disclose or fairly teach the transformer winding comprising N1 turns above the winding tap and N2 turns below the winding tap, where $N1 > N2$. With regards to claims 29, 30

and 35, the prior art of record does not disclose or fairly teach the interface section being a resistive interface section. With regards to claim 36, the prior art of record does not disclose or fairly teach a tuning means for establishing at least one of a predetermined return loss and tap value for the access connection point. With regards to claims 37-39, the prior art of record does not disclose or fairly teach The impedance boost is commensurate with a preselected tap value ranging between -10dB and -30dB.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
